NTT's Comprehensive Managed Services Powered by Pure Storage®

Managed Cloud, Application and Security Services

NTT + PURE STORAGE: PARTNERING FOR YOUR SUCCESS

NTT and Pure Storage have partnered to unlock a portfolio of comprehensive managed cloud, application and security services. NTT Managed Services on Pure's all-flash, 100% NVMe (non-volatile memory express)-based infrastructure provides customers with enterprise-grade scalability, sub-millisecond latency and unbounded application performance. Pure Storage all-flash array solutions integrate seamlessly with Microsoft, Oracle and SAP. Whether your workload is transactional, data warehousing or analytics-based, NTT can simplify your work tasks and dramatically improve system performance.

Clients benefit from NTT's deep expertise in managed cloud and IT services, and application and security services – along with Pure's storage architecture, which reduces TCO by up to 60%. NTT Managed Services on Pure Storage provides a superior client experience – with a highly secure and fully managed environment where application performance is never compromised.

OVERCOME COMMON, COSTLY IT CHALLENGES

- Avoid expensive forklift upgrades
- Detect and mitigate security threats
- Maximize uptime and services availability
- Avoid performance lags

- **Efficiently control and manage cloud** services, with more effective IT governance
- Eliminate environment management "headaches"

PURESTORAGE

WHY NTT AND PURE STORAGE?

Virtual, Comprehensive Support: Our managed security services provide 24x7 proactive monitoring and data protection. We can even serve as a virtual CISO for longer-term advisory needs and strategic planning.

Strategic Methodology and Non-Disruptive Upgrades: NTT provides an agile and optimized foundation for future growth and a data center migration methodology that's seamless and secure. This, combined with Pure's non-disruptive upgrades, minimizes disruption to business operations.

Unparalleled Client Experience: NTT, a trusted leader in managed services, and Pure, with a Net Promoter Score of 83.5, together ensure world-class customer experiences.

Single Platform: NTT owns all our data centers, which are SSAE 16 compliant, and controls the entire solution stack.

Better Application Performance: Pure Storage all-flash and 100% NVMe-based arrays provide up to 10x faster application speeds and sub-millisecond latency.

Flexibility and Choice: We offer hybrid-cloud flexibility in a public, private, hybrid or multi-cloud platform.

Highest Security: NTT on Pure Storage provides enterprise-grade security. The Purity operating environment secures data at rest with AES 256-bit encryption. Pure's data storage security measures meet the highest standards, including FIPS 140-2 data encryption.

Highly Available and Always-On: NTT's environment, powered by Pure Storage, provides 6 nines (99.9999%) availability, ensuring your IT infrastructure is always-on.

Lower TCO: Pure's industry-leading data-reduction technologies, all-Flash arrays and Evergreen storage model greatly reduce TCO.

EXAMPLE OF IMPROVING APPLICATION PERFORMANCE

Kraton Corporation, a leading global producer of engineered polymers, started experiencing performance lags with its SAP Business Warehouse application, and internal customers complained about the impact on productivity. After moving its SAP analytics workloads to Pure Storage through NTT, Kraton is observing a 5X improvement in data import processes! The company calls NTT "an extension of our IT department" and Pure "our silver bullet" for addressing performance issues.

> "
>
> It's like a car, and NTT is constantly dropping in a new engine for us. Pure Storage allows NTT to do this for us from a storage perspective.
