

Accelerating the
move to a stable,
secure and innovative
digital banking
experience, together

Right now, customer centricity is everything

To meet that challenge, we know Standard Bank has extensive ambitions to transform and evolve the banking experience.

To ensure relevance and strong engagement with your customers, there is a need to not only expand your product ecosystem but ensure your legacy systems remain unwavering. As your strategic technology trusted advisor, we're dedicated to supporting your transformation and innovation ambitions, while ensuring the stability of your core systems.

Together, we can create a customer-centric environment; enabled through a modernized network and supporting your zero-trust policy to enable faster, more secure and scalable digital banking.

Working with you, we'll create an always-on strategy; one that also enables you to extract the value from data, no matter where it exists – from the branch to the cloud to create the applications and digital banking experiences of tomorrow.

“ The digital banking marketplace has gained increased traction as FinTech's, and digital banks continue to gain a foothold and challenge legacy systems and infrastructure. The global pandemic has also changed the face of how we interact with our banks, strengthening the case for digital lending platforms and processes.

Generate increased revenue and drive competitive differentiation

Together, we can advance your capabilities and provide greater agility through network modernization.

We deliver a best-in-class transformation approach because of our deep understanding of your business, knowledge of the end-user experience and our vendor-agnostic approach to working with hyperscaler partners. Experience greater agility, speed, scalability and operational excellence through our network modernization capabilities.

Together, we can accelerate your growth through an agile, flexible and next generation network, supporting your strategic ambitions with reliable, innovative platform-based solutions.

We bring trusted local expertise and a deep range of global experience to support your strategic transformation goals.

“ Gartner has recognised NTT as a leader for Network Services and for Application Security Testing, as well as given us the top ranking for Critical Capabilities for Network Services.

IDC positioned us as a leader for Worldwide Colocation and Interconnection Services, and for Worldwide Network Consulting Services.

Build an always-on strategy

As your strategic, trusted technology partner, we collaborate with you to implement 'iNTTernconnected', next-generation solutions that enable an always-on strategy. Our full stack capabilities mean we can:

Provide superior, extensive and reliable connectivity to help you extract the value from data no matter where it's located - from the branch to the cloud.

Offer greater agility, speed, scalability and operational excellence through network modernization.

Create richer, more personalized experiences for your customers through access to our critical skills, consulting services and tools.

Enable rapid expansion and innovate faster to meet customer and market needs through agile, high-performing CX services and solutions, ensuring you realize your digital business strategies.

Create differentiated, intuitive and hyper automated experiences for end customers and employees alike.

“ From the very first discussion, NTT's team was enthusiastic and diligent in driving down into the details. This covered both the needs of our internal and external stakeholders as well as the technology solution that we have jointly created.

Matthew Normand, Head of Tech, Redburn

NTT DATA, helping you realize your strategic ambitions

We believe we're the perfect strategic and experienced partner to help you transform and drive greater revenue in your business:

Gartner has recognized NTT as a leader for Network Services and for Application Security Testing, as well as given us the top ranking for Critical Capabilities for Network Services.

IDC has positioned NTT as a leader for Worldwide Colocation and Interconnection Services, and for Worldwide Network Consulting Services.

Our global understanding of helping some of the world's leading financial services organizations transform, as well as our local understanding of your business; means we have the expertise to help guide and support your migration journey.

Our unique, global partnership agreements with leading technology providers ensure you get off-the-shelf access to the technology you need, rather than having to scout, evaluate and integrate them all yourself. This includes long-standing partnerships with Microsoft, Cisco, Palo Alto and AWS among others, coupled with attaining the highest partner accreditations and awards.

Our knowledge of your business, built up over many years of working with you means we understand and can bring stability to, your core systems and infrastructure. We can provide greater visibility into your technology estate, enabling in-depth simplification and cost optimization.

Our local capabilities across cloud, collaboration, networking, applications and security, coupled with the global network presence and R&D capabilities of NTT will help you extract the value from data that exists across your organization.

As your strategic and trusted technology partner, NTT ensures the stability of your core banking system no matter where it lies; enabling you to offer faster, more secure and scalable banking.

“NTT’s support and expertise in managing the 24/7 dedicated SOC assures us that we are well protected from the latest cyberthreats.

Vinay Tiwari, CISO, RBL Bankon
