

Reimagine networks.  
Rethink connectivity.  
**Relaunch your banking potential.**

Your strategic partner for global transformation

Relaunch your banking potential

**A managed end-to-end network platform would enable** optimized connectivity and accelerated transformation for Standard Chartered Bank. NTT can help make this happen.

Global disruption, the rise of fintechs, and constantly changing regulations are putting pressure on the banking industry. To stay ahead of your competition, you need to evolve your processes and become more data-driven and future-focused, while delivering exceptional experiences for your customers and employees.

You also need to embrace open banking and make the most of disruptive new technologies to become digital in every sense of the word.

Against this backdrop, we know there is pressure on the world's largest multinational companies (MNCs) to start making headway on carbon net-zero and play their part in helping stave off the worst effects of global warming. In fact, according to your 2021 net-zero report, Carbon Dated, more than two-thirds of MNCs are tackling supply chains' emissions as the first step in their net-zero transition. They're co-innovating to develop advanced services – such as taking AI into a scalable delivery model – that provide economic, environmental and societal value.

To be a global leader in cross-border banking and achieve your infrastructure consolidation strategy, you need a partner to help you transform. One that can help you digitalize at scale and make the most of automation to drive excellent customer experiences.

NTT would like to help you achieve all these goals and enable your global transformation. We have built a valuable relationship over the years – and we believe that, as your partner, we can do even more.

## Partnering with Standard Chartered Bank – locally and globally

Over the last two years there's been a significant acceleration in the adoption of advanced digital capabilities, driven primarily by the need to transform operations to become more agile and resilient.

Now, too many businesses battle with managing a patchwork of legacy systems nearing end-of-life, multiple devices, and technology and infrastructure that hampers operational efficiency and wider decision-making processes.

Yet, there's a lot to consider when establishing a reliable, secure foundation for transformation journey: organizations must transform their WAN architecture, expand their network edge, improve zero trust and control, increase automation capabilities and drive greater autonomy across their networks.

Doing so requires a managed end-to-end SD-WAN network platform that provides flexibility, agility and speed. It's a solid foundation on which to build more advanced capabilities like edge computing, cloud, voice collaboration, SaaS, IoT, Wi-Fi 6 and other new wireless standards.

We can be a true strategic partner for global transformation, supporting your strategic objectives and helping you become a more agile, streamlined and compliant bank.

With our solutions, you'll gain a stable foundation of infrastructure connectivity, network service, public-cloud service and security **that covers your global campus network infrastructure, SD-WAN, cloud and data centers across 55 countries.**

## Flexible support to deliver for your business – and your customers

From a stable base of infrastructure connectivity and security, we'll provide the building blocks to develop secure hybrid environments that can pivot quickly when required.

### Achieve new business outcomes made possible only with new technologies

We also offer additional on-site or remote support during preaudit and postaudit processing, or during the planned audit.

### Deliver new services and scale them faster

With an evolving and adaptive technology ecosystem, your strategic leaders can drive future-state innovation. You can also evolve new applications, financial products, services and business models – and scale them globally – faster. We'll also support the planning and delivery of your growth ambitions, helping you advance organizational agility and operational excellence to compete with fintechs and neobanks.

### Meet the requirements of your global teams and engage with your regional business

Change and pivot your operations without compromising on business and operational efficiencies across your business units. You can gain the agility to scale transformations and innovations globally, while being able to talk at a local-to-local level with your regional entities, too.

### Improve total cost of ownership (TCO)

Drive cost optimization at every point, gain end-to-end transparency and increase efficiencies to improve TCO. We'll help you create smoother operations by consolidating your platforms and simplifying your technology stack. This will make your operations more efficient and deliver an improved TCO.

### Optimize your global connectivity strategy

Our flexible architecture integrates global connectivity, network security and cloud access with a centralized delivery model. Our SD-WAN solution supports client-procured internet connectivity as well as NTT-provisioned connectivity. This means you can maintain relationships with preferred local providers and still gain from NTT's single client experience and network management tools.

## Why NTT

We've been working with your business for five years – a partnership we truly value – so we know better than anyone how best to support you. We also understand the challenges and intricacies of the financial industry. We've used data-driven initiatives to enable end-to-end visibility and control, and improve time to market, for companies such as PT Bank Central Asia.

### Unmatched analytics platform

- For true up-to-the-minute visibility of and detailed insights into network performance, we deliver updated reports every 60 seconds. The industry standard is 15 to 30 minutes.
- Our predictive network analytics tool identifies 95% of network infrastructure issues before they impact network health.
- 99% of tickets are opened proactively, which helps to improve availability.

### Reliable and secure network performance

- Our high-speed, low-latency Tier-1 Global IP Network spans five continents.
- We mitigate over 2 million cybersecurity threats every year.

### A platform that can run on any cloud

- We own our data network and data centers, and our managed SD-WAN platform delivers increased flexibility, greater cohesion and more interconnected processes across everything you do.
- We can also reduce the costs and complications of on-site data ownership to ensure more unified, agile systems and common processes.

### Managed services backed by proven experience and technology

Backed by comprehensive SLAs, our managed service solutions are underpinned by real-time analytics and advanced automation techniques, resulting in:

- Faster service activation and incident resolution intervals
- Improved standardization
- Optimized performance
- Improved resilience
- Enhanced control

## A strong commitment to work toward a more sustainable world

With a 150-year heritage of using technology for good, we're helping clients and the world reach net-zero by 2030. We have prioritized the reduction of our own emissions, and are building circularity and regenerative principles into our operations – to use technology to help protect our environment. We're also one of 17 Business Avengers supporting the achievement of the United Nations' Sustainable Development Goals by 2030.

## NTT recognized as a Leader\*

NTT has been named a Leader in the 2023 Gartner® Magic Quadrant™ for Network Services, Global\* for the tenth consecutive year, and is positioned highest on Ability to Execute and furthest in Completeness of Vision for the third consecutive year.

## Keeping you at the forefront of banking

As your strategic partner for global transformation, we can keep you at the forefront of banking, wherever you operate. We'll help you create future-focused and data-driven new services to keep your people engaged and your customers happy.

Together, we can reimagine connectivity and reshape your organization for current fitness and future readiness.

**Together, we can secure and transform the future of banking with you.**
