Frankfurt 4 Data Center
Home of AI and cloud computing
Frankfurt is regarded as an alpha world city and is Germany’s financial capital, as well as the major financial center of continental Europe. Major banks headquartered in the city include European Central Bank, Deutsche Bundesbank, Frankfurt Stock Exchange, Deutsche Bank, DZ Bank, KfW and Commerzbank. By market capitalization, the Frankfurt Stock Exchange is one of the world’s largest stock exchanges.

Frankfurt is also a major tech hub, as the city is rich in fiber and is home to the DE-CIX, one of the world’s largest internet exchange points. The city is also a vibrant start-up hub with a natural disposition for FinTech companies. Frankfurt is the leading data center market in Germany and is one of the largest data center markets in Europe. The city’s geographic location allows connections to Eastern and Western Europe, along with the Nordics and the Middle East (via Turkey), making it a very well-connected hub.

The Frankfurt 4 Data Center offers the best network connection and a power supply from two different substations with two feeds at 110/20kV level.

Our Frankfurt 4 Data Center is located 15km west of the city center in the area of Hattersheim and is our fourth data center in the Frankfurt region. Once fully built, the Frankfurt 4 Data Center will have 32,900m² of available colocation white space and will be supported by 82.3MW of IT load. The first building stage was completed in June 2019. The building B was opened in Q3 2021.

A solution for every requirement

With a total of 32,900m² IT space and 82.3MW IT load, Frankfurt 4 offers complete solutions for housing your IT and network systems in a secure, high availability environment. We provide you with the best possible physical and technical infrastructure supported by 2N UPS systems, N+1 generator backup, as well as highly redundant cooling systems. Frankfurt 4 holds multiple certifications and is connected to major carrier hubs and cloud networks, as well as to the DE-CIX.
Secure and flexible space built to your specifications

Your requirements are the most important aspect of our service offering. You choose, we deliver. Whether you select a building shell which you configure yourself, or we construct it according to your specifications, or even if you want to rent a single rack in our shared environment, we can accommodate your needs. We will also ensure the space is highly available through our years of engineering critical data centers while maintaining high levels of security to keep your infrastructure and data safe.

Overview of our main product offerings:

Frankfurt is a vibrant start-up hub with a natural disposition for FinTech companies.
Infrastructure

Data center space
- 32,900m² of IT space
- Flexible colocation deployments: single rack colocation, cages, suites, turnkey build to suites, shell and core solutions
- Ancillary spaces (offices, storages, and pre-installation rooms) available
- Common areas such as meeting rooms, and catering area
- Separated and independent technical area's per data center building

Cooling
- High efficient chiller systems with free-cooling integrated or separated recoolers and ownprogrammed, weather-dependent energy management systems
- CRAH units in the suites and technical rooms
- Concurrently maintainable AHUs providing fresh air pressurization and humidity control to data suites
- Cold aisle containment to support high densities and maximize efficiencies
- Heat recovery with heating pumps for pre-heating the emergency standby power systems

Fire protection
- Automatic digital fire alarm system on all levels with point and air aspiration detectors
- Very Early Smoke Detection Alarm system (VESDA) in the return air path
- Firefighting system based on a nitrogen extinguishing gas system fire protection walls to a minimum of 90 minutes separation (EI 90)

Security
- 24/7 Security Operations Center and Operation Control Center
- Redundant monitoring of all critical functions underpinned by standardized security processes and the multilevel security zone principle, secures the rental area and the technical operation
- Palisade fencing supported by a security perimeter fence to protect the campus
- Video surveillance systems for the external perimeter, plant areas, and data halls
- Ram-raid bollard protection in accordance to BS PAS 68:2013
- Card swipe entry/exit to all doors and persons separation locks per data center building
- Preventive risk assessment as well as continuous testing and training of operating personnel

Power
- On-site substation delivering 90MVA of power
- Client IT load of 82.3MW
- Average power density of 2.5kW/m²
- Power supply at 110/20kV level from two substations with two feeds
- Own substation with three 110/20kV transformers N+1
- Two separate UPS systems (A- and B- supply) with 2N redundancy
- Redundantly designed emergency power systems with diesel generators N+1

Global data center network
- Part of the NTT DATA family
- Connectivity options to our global network
Infrastructure

Connectivity
• Carrier- and cloud-neutral
• Redundant Carrier-Meet-Me-Rooms
• Redundant Carrier-Access-Rooms per building
• Carrier-mix from global Tier 1 supplier to regional supplier
• Connectivity to the major carrier hubs
• Pre-spliced dark fiber available on demand
• Redundant, structural cabling infrastructure with diverse paths
• Pre-Cabling to support fast Cross Connect deployments
• High-performance internet access
• Inter data center connectivity between our data centers for geo-redundant solutions
• Multi Service Interconnection Platform to connect our clients to major cloud service providers such as Amazon Web Services, Microsoft Azure, and Google Cloud Platform

Additional services
• Consulting, general and implementation planning for development projects
• Client Implementation Services
• Installation Services
• 24/7 Remote Hands Services
• Facility Services
• Additional Security Services

Service level agreement
• 99.999% power uptime availability
• Climate control conditions in line with ASHRAE guidelines
• Connectivity availability

Certifications
• ISO 9001
• ISO 27001 IT-Grundschutz
• ISO 22301
• ISO 50001
• ISO 45001
• PCI DSS
• TISAX
• §8a (3) BSIG/KRITIS
• EN 50600 (Bauteil A)
• ISAE 3402 Type 2 Report
• ISAE 3000 Type 2 Report
We are where your business is

We’re operating multiple data centers in 20+ countries and markets

NTT Global Data Centers

Learn more about Global Data Centers

Our global platform is one of the largest in the world, spanning more than 20 countries and regions, including the Americas, Asia Pacific, EMEA and India. NTT DATA is routinely recognized as a Leader by leading networking and data center analysts.

As a neutral operator, we offer access to multiple cloud providers, a large variety of internet exchanges and telecommunication network providers including our own IPv6-compliant Tier 1 Global IP Network.

You benefit from tailored infrastructure, and experience consistent best practices in design and operations across all of our reliable, scalable and customizable data centers. We’re ready to facilitate client adoption of next-generation technologies for computing at scale, virtualization, data migration, and cloud and B2B private connectivity both regionally and across the globe.

NTT DATA has made a net-zero commitment in alignment with the science-based target initiative across its operations by 2030 and the whole value chain until 2040. In addition, we drive towards powering our data centers with 100% renewable energy by 2030.
