

Compliance Recording for Microsoft Teams

ASC Recording Insights

Record and archive your Microsoft Teams calls, meetings, screen sharing and chat, whilst complying with legal requirements.

ASC Recording Insights is a Microsoft certified native built cloud solution for Teams, providing secure capturing and hosted in Microsoft Azure, integrating seamlessly with your collaboration platform.

Protect your business and ensure you are meeting legal or compliance requirements.

Capture insights to improve how your staff collaborates and serve customers to drive better business performance.

Secure and Flexible

ASC Recording Insights combines the reliability and security of compliance recording and analytics, with the flexibility to integrate the latest technologies into your workflows.

The solution is compliant with MiFid II, PIC-DSS, HIPAA regulations and more. Customers may opt for their data to be stored on their Office 365 tenant, or another storage platform of their choice.

Cognitive Services for Analytics

Get powerful, proactive insights using Azure Cognitive Services, with transcription and translation in over 70 languages, speech-to-text processing, and keyword spotting for easy search and reporting.

Simple & Fully Supported

As your single point of contact, we remove the complexities of managing multiple technologies end-to-end.

We streamline processes with our support services, change management, incident and problem management.

Cost Effective & Scalable

Delivered via the cloud, this solution has been built to deploy quickly and easily incorporate future business requirements without significant additional overhead.

Leverage our Leading Vendor Partnerships

Our expertise working with multiple leading global vendors supports your choice of platform and deployment models tailored to your needs. We can help drive greater end-user adoption, increasing productivity and returns on investment.

What you will get from ASC Recording Insights

Recording & archiving of audio, video, screen sharing and chat – in combination or alone

Full administration control, including automatic or manual recording control, access and playback rights management

Insights and analytics via reports generated on usage, compliance and data logs

Secure capturing with tenant-specific data encryption, group admin via Azure Directory and individual archiving rules

Importing & exporting of recordings

Transcriptions (speech to text) in 80+ languages and translations in 70+ languages

Predefined keyword display, categorisation and searching

Realise the many benefits of ASC Recording Insights
