

Network as a Service | India

# Managed SD-WAN

Custom-built connectivity services for agility, control and security

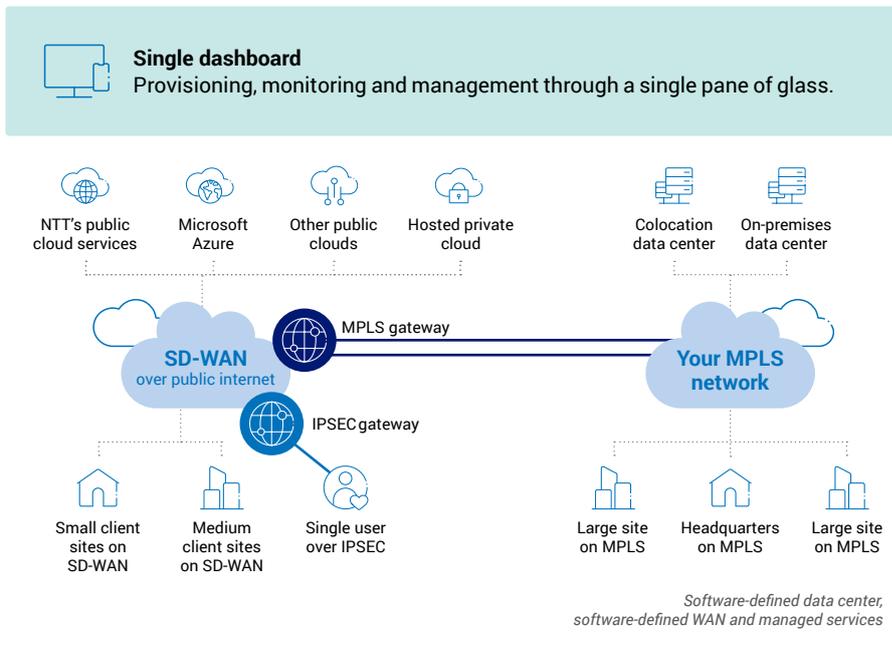

Take your WAN to the next level of performance with improved capacity, performance, security and agility, at a lower total cost of ownership.

## Service overview

**Dramatically increase the consistency and control of your enterprise's wide area network (WAN)**

- Designed specifically for the Indian market, our Managed SD-WAN services deliver increased agility, flexibility and ease of centralized management, as well as improved productivity – all while reducing your total cost of ownership (TCO).
- Prioritize your network traffic and work flexibly while promoting greater control, security and scalability. With Managed SD-WAN, you'll be able to abstract network components, dynamically reallocate network resources, and so much more.

## Our SD-WAN services

**Managed SD-WAN is designed to meet the data security, last-mile connectivity and performance monitoring requirements of Indian organizations.**

### Business outcomes and benefits

Business outcome	Benefits
<b>Greater capacity</b>	Build underlay over economic links like broadband and the internet, ensure you're using your entire network capacity and reduce dependency on mandatory WAN providers.
<b>Improved performance</b>	Minimize downtime through redundancy and use internet breakouts at branch locations to reduce the latency of software as a service applications. Refined, KPI-based routing decisions which use the best-performing path during an outage.
<b>Secure by design</b>	Turn your internet into a secure virtual private network (VPN) by using built-in i2-i4 firewall features, automatic encryption through AES-256, and network segmentation.
<b>Enable agility</b>	Accelerate the rate of site and application installations and changes with improved branch connectivity to overcome bandwidth, backup and server-overload challenges.

### How we deliver

#### Plans and packages

A wide range of Managed SD-WAN options

Business outcome	Basic	Value	Premium	Benefits
<b>VNF (service chaining)</b>				✓
<b>L22 VPN</b>			✓	✓
<b>Hybrid cloud connect</b>			✓	✓
<b>Security</b>		✓	✓	✓
<b>High availability</b>		✓	✓	✓
<b>Quality of service (QoS)</b>	✓	✓	✓	✓
<b>Zero-touch provisioning</b>	✓	✓	✓	✓
<b>Networks</b>	✓	✓	✓	✓

### Why NTT?

#### Tier-1 network

With our leading Tier-1 network, we provide the largest SD-WAN and VPN footprint across 190+ countries and regions.

#### Networking expertise

We have an extensive track record of designing, integrating, supporting and managing multivendor enterprise networks.

#### Stability

Leading technology services delivered through our robust, global organization minimize disruptions to your business.

#### Deep investment

We invest significantly in research and development initiatives to ensure we deliver groundbreaking services.
