

# Technical Services: Project Management

On budget, on time, every time.

Our **Project Management Services** help you to define predictable technology outcomes, leveraging our experience in planning and deploying complex technologies into client environments.

Global management and centralized delivery capability with local expertise, people and processes.

## Business outcomes and benefits

### On time and on budget project delivery

Our methodology, together with our deep expertise, enables consistent, on-time, accurate and cost effective delivery ensuring risk, time and resources are managed throughout the project's lifecycle.

### Accelerated time to value realization

Selection of the most appropriate methodology whether waterfall, agile or hybrid to ensure the project delivers to the optimal timelines.

### Lower operational cost and minimal disruption to business as usual

Avoid the necessity of onboarding additional in-house staff and the operational disruption of redeploying skilled resources.

### Seamless operational handover to in-house operations

Accelerate time to value for technology investments and modernization initiatives.

## Key project and program management features

### Certified professionals

Deep expertise and experience in leading and delivering programs and project streams for large and complex engagements.

### A single point of contact

A single point of accountability, communication and escalation.

### Global reach

Project delivery professionals situated in every region, ensuring global consistency.

### PMBOK (Project Management Body of Knowledge)-aligned and proven methodology

Over 30 years' experience of managing and delivering global projects for our clients.

## How we deliver

Using a consistent methodology and approach across all regions ensures that our team of project professionals delivers your engagement on time and on budget.

All projects have detailed critical success factors defined and are centered on the technical components of the solution being delivered.

### All projects are judged based on:

|  |  |   |  |  |  |   |
|--|--|---|--|--|--|---|
| <br>client satisfaction | <br>delivery within committed time frames | <br>delivery of the committed scope of the project | <br>delivery within agreed budget | <br>clear communication and reporting | <br>alignment with expected and committed quality standards | <br>achievement of defined business outcomes |
|--|--|---|--|--|--|---|

We measure and report on all the key performance indicators listed above to ensure we are delivering against your expectation throughout each project.

## Why NTT?

### Global coverage

800+ project professionals supporting seamless execution across multiple regions combined with 3,000 strategy, architecture, technology and delivery professionals.

### Multi-vendor support

Expertise, skills and certifications retained across multiple hardware and software vendors.
