

Cloud done right with NTT's Cloud Services

Strengthen business outcomes through improved total cost of ownership (TCO), stronger governance practices and a modernized, cloud-native approach to app development and delivery.

Meeting you where you are today, and helping you move forward.

Realize the promise of cloud

25%

is the average cost saving achieved through smarter licensing and workload calibration by our Cloud Economics practice.

2 billion

security threats are mitigated annually through our Security and Managed Threat and Detection (MDR) Services.

30%

is the average gains in speed-to-market realized from our application modernization and migration framework and practices.

76%

of surveyed IT leaders say the complexity of IT and the skills required to manage clouds increase exponentially with multicloud environments. Our multicloud services can help*.

4,200 highly skilled experts across 5 continents partnering with clients to realize the value of cloud.

That's us.

Tangible value to meet IT demands

Observability

- Leverages AI-ML for anomaly detection and creates alerts for unusual behavior, helping with troubleshooting and root-cause analysis.
- Includes predictive capacity services and proactive incident detection.
- Provides visibility to whole estate: network, infrastructure & cloud apps.

Security

- Proactively identifies and removes risk from your environment; automates continuous checking across your platform.
- Automatically suppresses false alerts — freeing up time for more business-essential matters.

Governance

- Features comprehensive management dashboards, providing visibility of all timelines, changes and approvals, plus reporting capabilities.

Integration

- 20 years of Cloud Services Delivery experience working with underlying cloud platforms and technologies to ensure business outcomes.

Automation

- Automates and resolves 30% of incidents.
- Reduces 80% of incidents via automated correlation.

Adaptive Cloud to Edge Platform

Your results
