

Private 5G as-a-Service

Fast. Secure. In your control. Everywhere

Mission-critical applications increasingly need continuous connectivity, zero latency, and high-capacity networks. With private 5G from NTT, we meet your needs for transformation, compliance, and security, along with global availability, seamless integrations, and flexible as-a-Service delivery.

Positioning you for future success

Increase security and business assurance while minimizing risk across your organization. We keep your IP safe with secure, reliable connectivity and communications

Grow your business globally with complete scalability. Deliver custom apps at scale, drive collaboration, and unify insights

Improve your business agility and responsiveness, spinning up new capabilities quickly and empowering your IT teams with insight

Control and manage your network development and delivery, to prioritize key apps and features for enhanced service delivery

Get exceptional performance with low latency delivery, zero lags and 24/7 availability, powering business performance across critical use cases

Deploy, adapt, and transform your 5G network, to drive business outcomes and leverage advanced new capabilities

Our private 5G-as-a-Service platform architecture

As your turnkey private 5G network partner, we can help **increase security while reducing risk to drive growth.** We'll help increase global reach and enhance business agility, making you **more resilient and adaptable.** And we'll drive **business performance and outcomes** without impact to your systems.
