We’re innovating and investing heavily in every layer of network infrastructure, from mobile, internet, cloud, and data centers, to security and SD-WAN services.

Why choose NTT for your SD-WAN requirements?
- Deep network visibility with real-time streaming network analytics that refresh reports every 60 seconds compared to an industry average of 15–30 minutes and includes DVR replay functionality.
- Cloud-based secure web gateway and security services activated and deactivated on-demand in minutes via the self-service portal.
- Direct first-call access to highly skilled network engineers (no call center menus) and a six-second average time-to-answer.
- AI-ops, self-healing and predictive network analytics operations that detect and alert 95% of issues before they impact business health.

Interconnecting the world’s biggest businesses, enabling digital collaboration

- One of the largest IP backbones in the world
- Global Tier-1 IP network spanning Americas, Europe, Asia and Oceania
- One world, one network: All access and migration with 1,660+ local providers and CDR

Stay nimble with asset-lite branches

- Agile branch networks
  - Fast service deployment
  - Set-up less complex quickly
  - Adapt services to meet business needs without waiting
- Complete branch service control
  - Complete service visibility
  - Consistent operations
  - Eliminate security loopholes
- Complete branch service execution
  - Complete branch service visibility
  - Eliminate security loopholes
- Maintenance is never a problem
  - Resilient cloud infrastructure
  - Eliminate downtime risk and management friction
- Better control
  - Services in the cloud
  - Milli-second security diagnostics
  - Make cost more predictable
- Instant service upgrades
  - Protect entire branch network
  - Maintain superior performance

Gartner® We’ve been named a Leader in the 2023 Gartner® Magic Quadrant™ for Network Services, Global* for the tenth consecutive year.
