NTT Ltd. has earned the SAP on Microsoft Azure advanced specialization

London, UK – 27 January 2020 - [NTT Ltd.](#), a leading global technology services company, today announced it has earned the SAP on Microsoft Azure advanced specialization, a validation of a solution partner's capability to deliver high-quality services in a specific solution area. The SAP on Microsoft Azure advanced specialization demonstrates NTT's deep knowledge, extensive experience and proven success at implementing SAP solutions on Microsoft Azure.

As mainstream support for the SAP ECC platform ends in 2025, and as core SAP products being re-optimized for the SAP HANA database, many enterprises are looking for a partner with advanced skills to migrate their existing SAP environment to the cloud.

"We are honoured to be recognized for our skills in implementing SAP on Microsoft Azure. The SAP on Microsoft Azure advanced specialization assures current and potential clients that we meet the standard for service delivery and support," explains Damian Skendrovic, Executive Vice President for Managed Services Go-to-Market at NTT Ltd. "As cloud technologies advance, it is critical that partners' skills keep pace. This advanced specialization clearly demonstrates to our clients that NTT Ltd. can meet their highest cloud demands now, and into the future."

Gaviella Schuster, Corporate Vice President, One Commercial Partner (OCP) at Microsoft Corp. added, "The SAP on Microsoft Azure advanced specialization highlights the partners who can be viewed as most capable when it comes to migrating enterprise SAP applications over to Microsoft Azure. NTT clearly demonstrated that they have both the skills and the experience to offer clients a comprehensive and professional SAP to cloud managed service."

For enterprises that are looking to migrate their SAP systems to Microsoft Azure, requiring advice and processes, NTT Ltd. is running one-to-one exploratory migration workshops on the possibilities of hosting SAP on Microsoft Azure. More details available at <https://www.ntt-azure4sap.com>
