Power, Flexibility, Control

Reliable and simple connections for small and medium business through Cisco Meraki

What does the future mean for you?
More complexity or more simplicity?
Bigger demands or bigger opportunities, IT as a cost or IT as an enabler?

Our Cloud Connect & Locate for Cisco Meraki is a leading solution that keeps powering businesses forward. It combines Cisco Meraki, one of the world's most powerful and secure cloud-based networks, with Cisco Umbrella delivered efficiently, reliably and consistently by our team of Cisco certified experts. We design, manage and deploy Meraki on a local or global scale, to unleash its power and meet your business needs.

Cloud Connect and Locate for Cisco Meraki enables small and medium businesses to implement smart initiatives and bring you closer to customers - with simple IT. You'll receive cloud controlled WiFi, routing and security in a box, with the ability to visualize your entire network through a centralized dashboard.

Businesses can improve customer engagement and loyalty through location analytics guaranteed through the integration of Purple Wi-Fi solution. The solution also comes with a Purple cloud portal that leverages your existing wireless network to provide web level analytics on location level customers, as well as rich customer experience data, automated and segmented communication workflows.

Benefits

- Simplified Network Management with cloud-based networks
- Lowered operational costs
- Increased security with automatic security updates from a cloud-based network
- Enable continuity in customer engagement digitally with cloud-based networks
- Greater IT agility and scalability as we take over your day-today operations
