NTT

HCI Solution
powered by Dell EMC

Together with Dell EMC, we can help transform your IT
Innovate today for a connected tomorrow

## Hyper-converged

Silos eliminated
- Faster deployment
- Simpler scaling
- Single support model

Single pool of virtualized resources

Automated, streamlined management

Improve efficiency

Lower OPEX costs

Agility
Public cloud, speed, efficiency and economics within the data center.

Scalability
Start small and easily scale up or scale down while maintaining performance levels.

Simplicity
Simplify operations and management. No silos, faster development with softwaredriven automation and LCM.

Our HCI solution combines best-in-class services with Dell VxRail hyper-converged appliance to deliver a multi-cloud ready stack. You'll enjoy enhanced compatibility, deep VMware integration, end-to-end lifecycle management and a new level of simplicity with extreme automation.

Together with Dell EMC, we help clients to digitally transform their IT by delivering the outcomes they need, by equipping them with advanced hybrid cloud and service models aligned to their business strategy.
As a Dell EMC Titanium partner, we empower businesses to create a truly actionable IT strategy by designing, implementing, deploying and managing hyperconvergence solutions, on a local or global scale.

Tapping into the power and flexibility of Hyper-convergence

Enabling your infrastructure for cloud-native and legacy applications

Streamlining the data center with software-defined infrastructure

Giving a boost to operation efficiencies ensuring the focus on business critical services

The adoption of a hyper-converged architecture enables your platform to run legacy and cloud native applications, while a software-defined infrastructure improves operation efficiencies and drives a business outcome focus. Our HCI Solution is the turnkey solution ready to achieve the next milestone in your hybrid IT strategy.

Solutions, benefits and features

Branch

2-Node Cluster EF560 series

Implementation Services *

3 year Support - Mission Critical app

Enterprise

3-Node Cluster P570F series

Single site

Implementation Services *

3 year Support - Mission Critical app

Mission Critical

8-Node Stretched Cluster PF570F series

Dual site

Implementation Services *

3 year Support - Mission Critical app

*incl. implementation - using either NTT Ltd. or Dell EMC Services

Solution benefits

- Provide faster deployment
- Lower cost of operations
- Increased ROI
- Provide more flexibility and agility

- Ability to manage , not only store, but also networking and computing to reduce data center complexity and increase scalability

- Improved operational efficiencies, automating deployment and accelerating your time to production

About our our Hybrid IT Managed Services

With our Hybrid IT managed services we integrate, manage, secure and optimize hybrid IT landscapes (including HCI) at scale, globally and consistently.
