NTT

Your managed transformation to cloud collaboration starts with our
Cloud Collaboration Readiness Workshop

Remote, or on-premises

Scheduled based on demand

Two workshop days; one week apart

Workshop details

Pre-requisite:

Completion of the Pre-workshop Questionnaire

Recommended stakeholders attending:

- Executive Sponsor
- Collaboration Lead/Architect
- Change Management/ Adoption Specialist / Deployment Lead
- Network and Security Lead
- Telephony, Video Team, Desktop, Support/Help Desk Leads
- Service Owner and Business Unit Leads
- Facilities Lead

How long are the workshops?

The workshops can be delivered in either 1 or 2 days. Our Unified Communications Specialists will contact you to discuss your specific considerations for implementing Cisco Collaboration and Communications solutions.

The workshops will be delivered by our professional service team, engaging with your business decision makers, technical team and change managers within your organization so as to cover all aspects of your Webex deployment.

Migrating from your current platforms can seem complex and daunting, the Cisco Cloud Collaboration Readiness Workshop helps you determine the suitability of your current deployments for a move to a subscription-based cloud solution.

NTT will help accelerate your transformation and define measurable business outcomes.

What is it?

The Cloud Collaboration Readiness Workshop delivered by NTT enables you to understand the implications and necessary drivers in moving existing on-premise collaboration solutions to Cisco's Cloud and Hybrid Cloud Collaboration platform.

What can I expect out of it?

Discovery workshop: Assess your current state, use cases, strategy, security

Readiness assessment: Perform analysis capability mapping to define a migration strategy

Recommendation report: Outline the solution and set an execution roadmap

Customer Success Plan

As a result of the Workshop, our professional services team will produce a comprehensive Customer Success Plan that will include the following areas:

- Current state review
- Requirements
- Technical findings
- Customer deployment findings and adoption plan
- Associated risks
- Next Steps

Why is it important?

Complete migration or adopting a cloud-first approach for collaboration is a good starting point to determine what you need to do and the best migration plan. The workshop will provide you with the necessary data to support your migration to cloud collaboration.

The workshop goal is to help your business determine:

The best way forward

The changes involved

The impact on all areas of your business

Workshop outline

Detail how **change management and adoption services** can support the successful implementation and management of your environment and user experience.

Explore how **Cisco Cloud Calling** can offer advantages and economies of scale over on-premises unified communications platforms.

Outline **key network and security considerations** for cloud and hybrid cloud migrations.

Detail the capabilities and considerations of **Webex Cloud Calling and Meetings** and align this to your collaboration experience requirements.

Review how office facilities, meeting rooms, end points and devices **support distributed working.**

Analyze the **key collaboration experience outcomes** you are looking to enable for your end users, customers, and supply chain.

Explore key support and **managed service considerations.**
