Manila Makati Data Center

Our Manila Makati Data Center is a 30-minute drive from Ninoy Aquino International Airport, and a 40-minute drive from central Manila.

Features and benefits

Philippine Economic Zone Authority (PEZA) accredited building

Our Manila Makati Data Center is accredited by PEZA, a government agency.

Carrier neutral

Manila Makati Data Center is open to local and international carriers and international service providers. Also, it has the ability to reach global and national markets by being colocated in the same facility as domestic and international carriers

Large capacity and Tier III design

The capacity of this data center is approximately 3,500 racks, which is Tier III equivalent.

Specifications

Power:

- Single path
- UPS in 2N configuration
- Diesel generator in N+1 configuration
- Dual power feed to each rack
- Power supply: up to 4,6kW/rack

Airconditioning:

- Water-cooling system
- N+1 configuration

Security:

- Preregistration
- Photo identification
- Integrated circuit (IC) card authentication
- Biometric authentication
- Anti-tailgating system

Certification:

- ISO 9001
- ISO 14001
- ISO 20000
- ISO 27001
- ISO 22301
- PCI DSS

Other facilities:

- Meeting room
- Parking space
- Office space for clients

Location

Manila Paranaque Data Center

Our Manila Paranaque Data Center is a 30-minute drive from Ninoy Aquino International Airport, and a 50-minute drive from central Manila.

Features and benefits

Purpose-build Data Center Building

Our Manila Paranaque Data Center is located on a one-hectare property in Paranaque city. The facility is a purpose-built telco-grade and international internet data center facility.

Carrier neutral

This data center has the ability to reach global and national markets by being colocated in the same facility as domestic and international carriers.

Total solutions

Our Manila Paranaque Data Center provides colocation services, data and network security, disaster recovery, business continuity planning, and a host of other managed services and customized solutions that meet specific client needs.

Specifications

Power:

- Single paths
- UPS in 2N configuration
- Diesel generator in N+1 configuration
- Dual power feed to each rack
- Power supply: up to 10kVA/rack

Airconditioning:

- Water-cooling system
- N+1 configuration

Security:

- Preregistration
- Photo identification
- Integrated circuit (IC) card authentication
- Biometric authentication
- Anti-tailgating system
- Escorted access

Certification:

- ISO 9001
- ISO 27001

Other facilities:

- Meeting room
- Parking space
- Office space for clients

Location

Manila Pasig Data Center

Our Manila Pasig Data Center is a 60-minute drive from Ninoy Aquino International Airport, and a 40-minute drive from central Manila.

Features and benefits

Philippine Economic Zone Authority (PEZA) accredited building

Our Manila Makati Data Center is accredited by PEZA, a government agency.

Carrier neutral

Manila Makati Data Center is open to local and international carriers and international service providers. Also, it has the ability to reach global and national markets by being colocated in the same facility as domestic and international carriers

Large capacity and Tier III design

The capacity of this data center is approximately 3,500 racks, which is Tier III equivalent.

Specifications

Power:

- Single path
- UPS in 2N configuration
- Diesel generator in N+1 configuration
- Dual power feed to each rack
- Power supply: up to 6,9kW/rack

Airconditioning:

- Water-cooling system
- N+1 configuration

Security:

- Preregistration
- Photo identification
- Integrated circuit (IC) card authentication
- Biometric authentication
- Anti-tailgating system

Certification:

- ISO 9000
- ISO 14001
- ISO 27001
- ISO 20000
- ISO 22301
- PCI DSS
- SOX 404

Other facilities:

- Meeting room
- Parking space
- Office space for clients

Location

Clark Data Center

Our Manila Pasig Data Center is only a 10-minute drive from Clark International Airport, and a 2-hour drive from central Manila.

Features and benefits

Purpose-built

Our Clark Data Center is designed and built based on seismic zone four standards, and is able to withstand magnitude eight earthquakes.

Disaster recovery site

This Data Center is located 194m above sea level, and 55km away from the nearest body of water to minimize flood and tsunami risks. This ensures a suitable location for a disaster recovery site, and is only 90km away from Manila.

Specifications

Power:

- Single path
- UPS in 2(N+1) configuration
- Diesel generator in N+1 configuration
- Dual power feed to each rack
- Power supply: up to 5,5kW/rack

Airconditioning:

- Water-cooling system
- N+1 configuration

Security:

- Preregistration
- Photo identification
- Integrated circuit (IC) card authentication
- Biometric authentication
- Anti-tailgating system

Certification:

- ISO 9001
- ISO 14001
- ISO 20000
- ISO 27001
- ISO 22301
- PCI DSS

Other facilities:

- Meeting room
- Parking space
- Office space for clients

Location

Cebu Data Center

Our Cebu Data Center is only a 20-minute drive from Mactan-Cebu International Airport.

Features and benefits

Earthquake-proof design

Our Cebu Data Center is designed and built based on seismic zone four standards and can withstand high magnitude earthquakes.

Carrier neutral

This data center has the ability to reach global and national markets by being colocated in the same facility as domestic and international carriers.

Specifications

Power:

- Single path
- UPS in 2N configuration
- Diesel generator in N+1 configuration
- Dual power feed to each rack
- Power supply: up to 9,2kW/rack

Airconditioning:

- Water-cooling system
- N+1 configuration

Security:

- Preregistration
- Photo identification
- Integrated circuit (IC) card authentication
- Biometric authentication
- Anti-tailgating system

Planned certification:

- ANSI/TIA-942 Design Rating 3 (on-going assessment)
- ISO 9001
- ISO 14001
- ISO 20000
- ISO 27001
- ISO 22301
- PCI DSS

Other facilities:

- Meeting room
- Parking space
- Staging room
