

# Managed Cloud Services for Oracle® E-Business Suite Optimal

Application Performance in a Secure Private Cloud

**Oracle E-Business Suite is the most comprehensive suite of integrated, global business applications, for everything from supply chain management to value chain planning.**

**NTT provides complete end-to-end Managed Cloud Services for Oracle E-Business Suite applications with proven business value across multiple industries to help companies reduce costs and improve operations.**

## **Optimize Your Oracle E-Business Suite Investment**

NTT provides a complete Oracle E-Business Suite 11i/12 hosting service that combines deep application expertise and world-class Managed Cloud Services, to deliver a fully managed, optimized, and scalable solution for implementations, migrations, and upgrades of any size. When you partner with NTT for application hosting and management, you gain in-depth knowledge and expertise that you can trust. Our Oracle E-Business Suite and ERP professionals help customers host, manage, upgrade, and maintain Oracle E-Business Suite applications.

## **End to End Oracle E-Business Suite Hosting and Administration**

NTT provides a complete hosting and application management service, with access to experts who provide strategic guidance and advice and manage the day to-day operations for Oracle E-Business Suite applications, so IT teams can focus on strategic growth. With over 17 years of experience implementing, hosting, upgrading, and managing Oracle ERP environments, NTT is a cloud hosting leader, delivering end-to-end managed cloud services for Oracle E-Business Suite. We can customize Oracle hosting and management solutions to match your unique business needs.

## **Flexible Deployment Options**

The choice is yours. You can choose the best deployment model for your business. NTT can manage your Oracle E-Business applications on premises or in one of our state-of-the-art data centers. Our Oracle application teams and next generation infrastructure provide the optimal performance necessary to stay agile in today's rapidly changing business environment.

## **Security, Compliance, and Control**

NTT designed world-class data centers with the highest security standards and compliance. We considered the full range of security features in our design: construction standards, such as concrete and steel-reinforced walls, multi-layered biometric access controls, redundancy for every component, and strict process and procedures. Your applications and data are protected over a highly secure connection that incorporates the most stringent security standards.
