Managed Application Services

Managed Cloud Services for Oracle® JD Edwards

Optimal application performance in a secure cloud

Whether you are a new or an existing Oracle JD Edwards customer, **we provide complete end-to-end Managed Cloud Services for Enterprise One and World applications,** with proven business value across multiple industries.

We enable organizations to optimize IT investments and focus on strategic business needs to meet competitive market demands.

Optimize your JD Edwards investments

We provide a complete JD Edwards application hosting service that combines deep application expertise and best of its kind Managed Cloud Services, to deliver a fully managed, optimized and scalable solution for JD Edwards Enterprise One and World implementations, migrations and upgrades of any size.

When you partner with us for application hosting and management, you gain in-depth knowledge and expertise that you can trust. Our JD Edwards professionals fully manage IT environments with customized and flexible solutions.

Oracle JD Edwards hosting in the NTT Cloud

Our Managed Cloud Services enable enterprises to leverage their JD Edwards investments to extend into the cloud with greater value, choice and confidence. With over 20 years of experience implementing, hosting, upgrading and managing JD Edwards environments, we are the cloud hosting leaders.

We deliver end-to-end managed cloud services for JD Edwards EnterpriseOne and World applications, middleware, database and hardware technologies. We help clients maximize their IT investments in the cloud with world-class security and best practice regulatory compliance.

Flexible deployment options

The choice is yours. Choose the best deployment model for your business. We manage your Oracle applications on premises or in one of our advanced data centers. Our JD Edwards application teams and next generation infrastructure provide the optimal performance necessary to stay agile in today's rapidly changing business environment.

Security, compliance and control

We designed state-of-the-art, world-class data centers with the highest security standards and compliance. We considered the full range of security features in our design: construction standards such as concrete and steel-reinforced walls, multi-layered biometric access controls, redundancy for every component, and strict process and procedures.

Regardless of the network solution designed for your implementation, your applications and data are protected over a highly secure connection that incorporates the most stringent security standards.
