

Securely deploy Microsoft Teams for remote working

Our **secure remote working workshop** ensures your organization can leverage the benefits of Microsoft Teams, and move towards developing an effective deployment plan.

Remote work is enabling millions of workers around the world to stay productive, helping organizations to maintain business continuity in the face of our global health crisis.

Secure remote working workshop

Enable your team to work from anywhere with a remote workshop to securely deploy Microsoft Teams. With this one-day workshop, we'll show you how you can use Microsoft Teams to:

Empower people to stay connected

- Enable people to meet and collaborate from home.

- Engage people with virtual events and communications.
- Make productivity applications available on any device.

Maintain security and control

- Enable cloud identities with single sign-on and self-service password reset.
- Secure, remote access to Microsoft Teams.

Workshop outputs

The output of the secure remote working workshop will be a set of rapid response recommendations for Microsoft Teams including:

This one-day workshop is delivered remotely and often includes a change management practitioner, governance specialist and UC consultant.

2019 Partner of the Year
Intelligent Communications

This workshop enables you to rapidly deploy remote work scenarios to empower employees to stay connected, while maintaining security and control.

Prepare

Evaluate your remote work options and business implications in one workshop.

Design

The goal is to enable remote work quickly, with more advanced options at a later stage.

Deployment Plan

The one-day workshop leaves you with a concrete deployment plan, timelines, and next actions.

Goal

Help you rapidly deploy remote work scenarios to empower your employees to stay connected, while maintaining security & control.

Scope

Enable identity

Single sign-on and self-service password reset.

Providing Teams adoption kit

End user training, workload introductions and support resources.

Rapid deployment of Teams

Guided checklists, activation, installation and configuration.

Secure access to Teams

Applying baseline security like conditional access and multi-factor authentication.
