

# Securely deploy Microsoft Teams for remote working

Our **secure remote working workshop** ensures your organization can leverage the benefits of Microsoft Teams, and move towards developing an effective deployment plan.

**Remote work is enabling millions of workers around the world to stay productive, helping organizations to maintain business continuity in the face of our global health crisis.**

## Secure remote working workshop

Enable your team to work from anywhere with a remote workshop to securely deploy Microsoft Teams. With this one-day workshop, we'll show you how you can use Microsoft Teams to:

Empower people to stay connected

- Enable people to meet and collaborate from home.
- Engage people with virtual events and communications.
- Make productivity applications available on any device.

Maintain security and control

- Enable cloud identities with single sign-on and self-service password reset.
- Secure, remote access to Microsoft Teams.

## Workshop outputs

The output of the secure remote working workshop will be a set of rapid response recommendations for Microsoft Teams including:

This one-day workshop is delivered remotely and often includes a change management practitioner, governance specialist and UC consultant.

2019 Partner of the Year  
Intelligent Communications

## This workshop enables you to rapidly deploy remote work scenarios to empower employees to stay connected, while maintaining security and control.

### Prepare

Evaluate your remote work options and business implications in one workshop.

### Design

The goal is to enable remote work quickly, with more advanced options at a later stage.

### Deployment Plan

The one-day workshop leaves you with a concrete deployment plan, timelines, and next actions.

## Goal

Help you rapidly deploy remote work scenarios to empower your employees to stay connected, while maintaining security & control.

### Scope

#### Enable identity

Single sign on and self-service password reset.

#### Providing Teams adoption kit

End user training, workload introductions and support resources.

#### Rapid deployment of Teams

Guided checklists, activation, installation and configuration.

#### Secure access to Teams

Applying baseline security like conditional access and multi-factor authentication.

## Who should attend?

You will get the most benefit from this workshop by including these recommended stakeholders, from your organization:

- Project sponsor
- Data protection officer
- Security officer
- IT Office 365 administrator
- Project team representatives
- Business stakeholders
- IT operations
