# Disaster Recovery Site Infrastructure

Ensure resilience in the face of uncertainty

**Disaster Recovery Site Infrastructure supports quick and effective recoveries** with our highly available and flexible disaster recovery sites

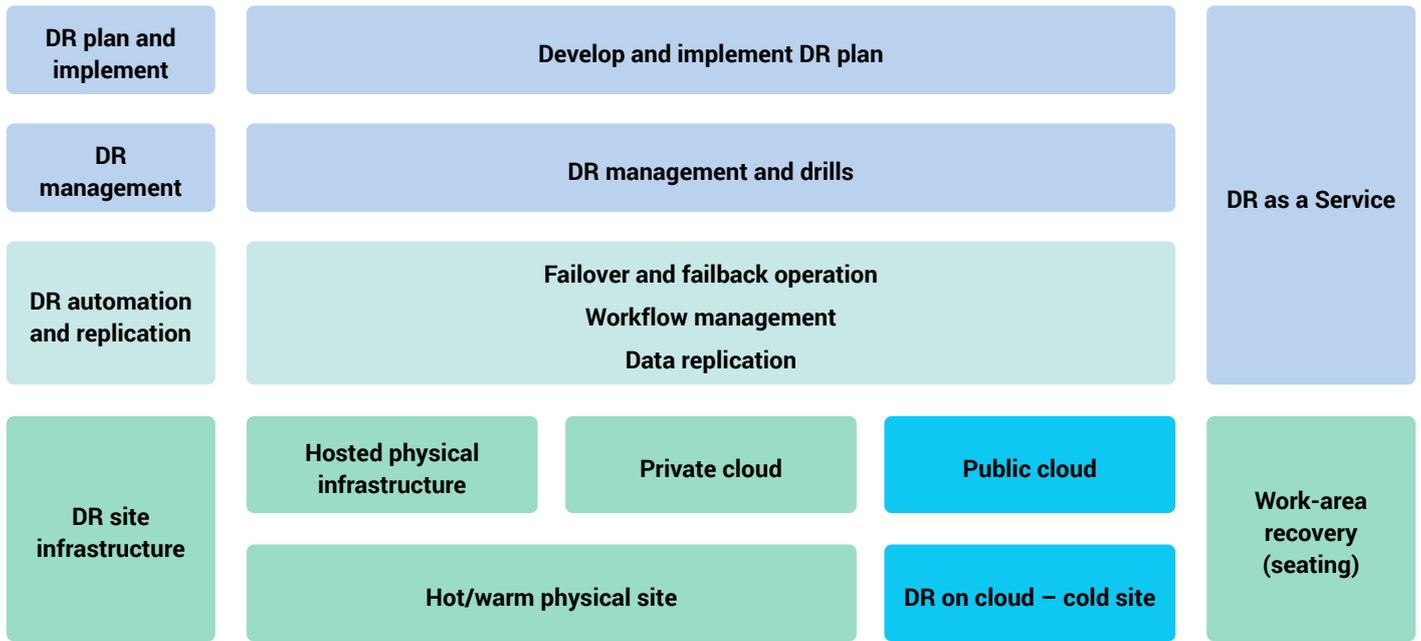

## Service overview

**A powerful combination of hosted physical and cloud infrastructure a highly effective and responsive DR system.** Our best-of-breed data centers, carrier-neutral facilities and cloud infrastructure across multiple seismic zones, in addition to secure colocation options and contextual security, ensure your data is protected and recoverable.

**We help you assess and proactively address your disaster recovery and data resiliency needs.** These may be as simple as keeping a secure backup of your data and business-critical information, or as complex as full-scale enterprise data resiliency. We have the right capabilities for any solution and budget, whether you're a small or medium enterprises or large multinational.

Business outcome	Benefits
<b>Reduce risk and meet targets</b>	Real-time, continual monitoring and predictions of recovery point objective and recovery time objective (RPO and RTO)
<b>Simplify and accelerate DR</b>	Use automated runbooks and processes with predefined workflows
<b>Reduce recovery time</b>	Recovery automation library patterns simplify complexity
<b>Increase availability</b>	Use intelligent workflow management to manage DR and resiliency

The power of hosted physical and cloud infrastructure **enables a highly effective and responsive disaster recovery system.**

### Key service features

- DR on cloud enables you to eliminate the cost and complexities of conventional DR practices
- Public/private cloud or hybrid options offer greater flexibility in selecting and operating a suitable DR site
- Dedicated or shared work-area recovery seating allows for immediate intervention by your technical teams in case of emergency

### Why NTT?

#### Carrier-neutral

Our 10 robust data center facilities use multiple internet providers, ensuring full network redundancy and high network availability

#### Global track record

We have deployed and managed cloud services for over 2,500 clients, across platforms and industries

#### Range of options

Our highly available and flexible DR sites follow private, public or hybrid cloud models

#### No lock-in period

With our zero lock-in public cloud plans, you can exit the contract anytime you wish to
